The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
	10/540,513	OSADA ET AL.				
Office Action Summary	Examiner	Art Unit				
	EDUARDO A. RODELA	2893				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 31 Ma	arch 2009.

### **DETAILED ACTION**

This Office Action is to replace the Final Rejection Office Action mailed December 12, 2008. Claims 1 and 2 are under consideration.

# Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "wherein said undoped GaAs layer..." as recited in line 10 of the claim, which raises the question of which layer this is. Since the limitation of "undoped GaAs layers" are previously mentioned in line 6 of the claim, it is unclear which of these two layers the "undoped GaAs layer" actually is. There is insufficient antecedent basis for this limitation in the claim.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanimoto et al. (JP 05-226372) in view of Kuroda et al. (US 5,831,296).

Regarding claim 1, Tanimoto et al. shows (e.g. Figure 6) a compound semiconductor epitaxial substrate for use in a strain channel high electron mobility field effect transistor, comprising:

an InGaAs layer [3] as a strain channel layer; and
an AlGaAs layer [9] containing n-type impurities as an electron supplying layer;
wherein undoped GaAs layers [2,4] having a thickness of 4 nm or more

[paragraph 0004, "spacer layer width was 2 thru/or about 4 nm"] each are laminated
respectively in contact with a top surface [shown] and a bottom surface [shown] of said
strain channel layer [4];

wherein said undoped GaAs layer [both 2, 4] in contact with an undoped AlGaAs layer [8 or 15]; and

wherein said AlGaAs layer containing n-type impurities [9] is in contact with said undoped AlGaAs layer [8].

Tanimoto does not disclose wherein said InGaAs layer has an electron mobility at room temperature of 8300 cmA2 / V\*S or more.

Kuroda shows wherein said InGaAs layer has an electron mobility at room temperature of 8300 cmA2 / V\*S or more [column 5, lines 5-17]. Kuroda states that InvGal\_vAs will have at least a value of between 8500 and 33000, especially if y0.3 [column 5: lines 5-17], which Sawada does show [shown in Figure 1].

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention that the semiconductor layer of Tanimoto would have the electron mobility specified by Kuroda, as it is known in the art that the specified material could

have an electron mobility at room temperature of 8300 cm<sup>2</sup> / V\*S or more with the required y value.

Regarding claim 2, although not shown by Tanimoto, it is clearly shown by Kuroda et al. that it is possible and evident that the compound semiconductor epitaxial substrate according to claim 1, as shown in Figure 3a, wherein the InGaAs layer constituting said strain channel layer [24] has an Indium composition of 0.25 or more [column 5, lines 5-17].

One would have been motivated at the time the invention was made to have used wherein the InGaAs layer constituting said strain channel layer has an In composition of 0.25 or more in the invention of Tanimoto as taught by Kuroda, for the purpose of increasing the electron mobility of the device.

#### Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2893

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

## Fax / Telephone Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to EDUARDO A. RODELA whose telephone number is (571)272-8797. The examiner can normally be reached on M-F, 9:00AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Davienne Monbleau can be reached on (571) 272-1945. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
